SPA LAB
6+
Spa Lab is a great science kit that combines STEAM learning.

SPA LAB
Spa Lab is a great science kit that combines STEAM learning. This set comes with four different experiments: DIY toothpaste, shower gel, shampoo and loofah, through which children will learn how to keep themselves clean in real life while cultivating their hands-on ability. Engaging in these fun projects, kids will satisfy their curiosity as well as get inspired to explore science. Meanwhile, this kit offers a great way for parents to spend more quality time with their children. The package contains everything you need for the projects, very easy to get started. Each experiment is easy to perform and understand, which will best help children develop a love for science.
PACKAGE INCLUDES:
Black Pigment x1
